

# Collaborative LaTeX Writing using Git and Github Actions

Laurence Kedward

January 17, 2023

Repository available at: <https://github.com/LKedward/latex-github-collab>

## 1 Compiling Locally

### 1.1 Prerequisites

Compiling locally is possible with any LaTeX distribution; the github actions workflow running on Ubuntu 20.04 uses the following packages (all installable via ‘apt’):

#### Mandatory

- `texlive-latex-recommended`
- `texlive-latex-extra`

#### Optional

- `texlive-latex-utils` (for `texcount`)
- `rubber` (for using the Makefile)
- `perl` (for `texcount` and `latexdiff`)
- `latexdiff`

### 1.2 Makefile

For convenience a Makefile is included which relies on the [rubber](https://gitlab.com/latex-rubber/rubber/) LaTeX wrapper:

```
$ make                # generate paper.pdf
$ make clean          # cleanup
$ make spellcheck     # run codespell
$ make count          # run TexCount
$ make diff           # run latexdiff with master
```

## 2 License: MIT

The Makefile and Github actions workflow are licensed under the MIT license
